Approach of Dementia Care in Kunitachi City

The 56 visiting care cases of dementia patients who are living alone

(findings in this study)

- ①Cooperation with medical care*inform the doctors of accurate patient status
 - * the need of medical care on dementia
- 2Family support
 - *mitigate care burden
 - *resolve conflicts among family members
- 3 Recognize the changes of patient status
 - *who should notice them,
 - and to whom convey the information
- Need of community support
 - *person with dementia can't live alone with the help of present social support (sometimes it is not enough)

(Improvement in Care management)

★Regular exchange of information with Care manager

Recognize the change of the status

- ★Level up the technique of dementia care

 Specialist (Dr.) for dementia care

 Case management meeting
- ★Cooperation among the Community

for continuous support
(inhabitants/medical staff/ care staff
/local government)

Management for wandering elderly with dementia

Analysis of 13 wandering person with dementia

(There is reasons for going out & wandering)

Desire

Tto go working to the office

Tto do exercise I

Tto eat breakfast]

Lose one's way

Fcan't return from the
post office J

- Delirium
- Other reasons

```
(Management)
Using GPS
   (in one's bag)
Watching
     ( inhabitants, shopkeepers,
police, care managers, etc.)
Food delivery service
   (to supply daily food)
Daytime Care
   (place to stay)
Working with
  Offices of Care giving
  Local government
```

Aiming at Community where person with Dementia can go out & wandering safely
